

MERITOR® ALL-MAKES AIR SYSTEMS REPLACEMENT COMPONENTS

MERITOR

ONE GREAT PORTFOLIO.

Choose The Best Fit For Your Needs.

The Meritor® all-makes air systems replacement components portfolio offers more than 1,000 new and remanufactured components for tractor, truck, bus and trailer applications. It offers you different levels of value, including Meritor replacement parts and Meritor Reman parts. Each designed and engineered to meet exacting OE quality specifications, while also meeting your duty cycle and application requirements.

Our single source complete portfolio includes over 120 all-makes air dryers and kits, over 600 reman air compressors, over 100 new air valves and over 120 reman air valves. Each is designed to replace competitive products and meet OE quality specifications.

Performance Advantages:

- Provides a single source for over 1,000 all-makes air systems components
- Includes air systems components for tractor, truck, bus and trailer applications
- Complete portfolio of new and remanufactured OE-quality aftermarket air systems components designed to replace competitive products with pricing options
- Includes aftermarket new/core-free and remanufactured air valves, air dryers, cartridges and service kits, air compressors, air hose assemblies and fittings, air tanks and more

Features and Benefits:

- Saves you time and money when you consolidate purchasing with Meritor vs. various suppliers
- Maintains vehicle braking performance and compliance, while reducing operating costs
- New/core-free products save you time, cost and space by eliminating core management
- Quality remanufactured products, including air compressors, air dryers and cartridges, as well as air valves, all competitively priced
- Meritor all-makes air systems components provide the same form, fit and function as OE parts
- Fully supported with the industry's most advanced parts and information site – MeritorPartsXpress.com
- Unsurpassed service provided throughout North America by our industry-leading Customer Care team

Compressors:

- All replacement parts meet or exceed exacting specifications
- Inlet seats are replaced
- Cylinder bore crosshatching angle is maintained 100%
- Cylinder blocks are machined to meet exacting specifications
- All connecting rods are compatible with turbocharging
- New ring sets and pistons are matched to reconditioned cylinder blocks
- Exhaust seats are machined to meet exacting specifications
- The head assembly is completely disassembled, inspected, cleaned and machined to meet exacting standards
- All units are dynamometer tested

Air Dryers:

- Cartridges are freshly charged with all-new desiccant that meets or exceeds exacting specifications
- Filters and O-rings are replaced 100%
- A new purge valve, relief valve, heater and springs are installed on all new dryers
- All dryers are tested in charge and purge cycles
- All new dryers have soft seat pistons to help handle higher turbo boost pressure
- Pop-off valves are precisely machined to avoid leaks
- Standard and coalescing dryer cartridges available
- Feature heavier-gauge metal to ensure integrity

Valves:

- All units have N70 Nitrile elastomer rubber and seals to withstand wide temperature extremes
- OEM synthetic grease is used on all units
- All pistons have a proven long-life design equivalent to the OEM units
- All crack pressures meet exacting specifications
- All-metal construction meets exacting specifications for each unit in the program
- Units are batch-tested to ensure quality before goods are sold in the marketplace
- All threads are tested to ensure they meet exacting standards
