

MERITOR® AIR DRYER PORTFOLIO

WABCO GENUINE AIR DRYERS

WABCO Genuine OEM air system replacement products are the exact same parts as those used on a new OEM vehicle. Choosing WABCO System Saver Series air dryers ensures genuine replacement products manufactured and tested to the same high standards as the originals, for dependable performance.

WABCO SYSTEM SAVER SERIES AIR DRYERS.

Compact and lightweight, WABCO air dryers are perfect for limited space applications such as those in newer aerodynamically-designed vehicles. They allow for easy installation and can meet virtually any vocational requirement.

All WABCO air dryers are available with optional turbo cut-off valve and/or discharge line unload option.

SYSTEM SAVER™ HP AIR DRYERS.

A compact, lightweight dryer featuring a cartridge-style governor and purge valve. Optimized for an industry-leading low number of components to offer higher drying capacity, easy installation and simple maintenance.

- Internal purge volume which does not use system air for regeneration, maximizing available air for braking, suspension and transmission
- Internal governor simplifies plumbing, reduces overall installed cost, has improved functionality and faster response timing
- Premium desiccant, providing greater water adsorption capability

- 13% better drying capacity compared to other leading manufacturer's most efficient model
- 14% lighter compared to other leading manufacturer's lightest model and 30% lighter than our previous generation

SYSTEM SAVER™ 1200 SERIES AIR DRYERS.

System Saver 1200.

Featuring a lightweight design, these dryers function with normal brake systems, require no additional reservoirs and use system air for regeneration.

System Saver 1200 Plus.

Designed to be compatible with the latest engines and EPA emission control systems, these air dryers are a direct alternative to competitive OEM AD9 air dryers.

- Purge volume is internal to the air dryer and does not use system air for regeneration

- Integral governor simplifies plumbing and provides faster response timing
- For use with a dedicated purge tank

System Saver 1800P Air Dryers.

Featuring a larger 1800cc desiccant cartridge, these air dryers offer increased drying capacity for heavy-duty applications.

SYSTEM SAVER TWIN AIR DRYERS.

- Designed for continuously operating compressors and vehicles with several air accessories, the System Saver TWIN is the smallest continuous-duty dryer available on the market.
- Feature a sequential two-cartridge air dryer system that allows one cartridge to regenerate while the other cartridge continues to dry air

WABCO AIR DRYER CARTRIDGES AND REPAIR KITS

WABCO air dryer cartridges are genuine OE specification equipment for that “same as original” performance. Designed for efficient operation, these cartridges can increase the capacity of non-WABCO dryers and dry more air than competitive products. All WABCO air dryer cartridges feature spin-on/spin-off capability for fast, easy replacement.

SYSTEM SAVER SERIES STANDARD AIR DRYER CARTRIDGES.

WABCO has the highest drying performance cartridges in the aftermarket. Ensure peak air dryer performance with regular planned maintenance utilizing WABCO Genuine air dryer cartridges.

System Saver HP, 1200 Series and TWIN Standard Cartridges.

SYSTEM SAVER COALESCING CARTRIDGES.

Today’s high-performance commercial vehicle engines are placing greater demands on air systems than ever before. Count on WABCO coalescing cartridges to maintain system performance.

WABCO coalescing cartridges are best in class to prevent oil from passing through to downstream systems, which helps you avoid expensive repairs and keeps your vehicle in top running condition.

- Reduce the aerosol oil in the air system to maintain factory performance levels of downstream valves by not allowing oil to clog or slow valves

- Extend the life of downstream valves by reducing the oil exposure that can damage rubber seals
- System Saver HP, 1200, and TWIN air dryer applications R950068A
- System Saver 1800 R950069

System Saver 1800 Standard Cartridges.

- Higher volume, more air drying capacity R950048
- Spin-on/spin-off design allows for quick and easy maintenance R950011

AIR DRYER REPAIR KITS.

- Air dryer repair kits are a cost effective way to improve operation and renew the air dryer to its original performance when replacement is not an option.
- Feature WABCO Genuine components
- Include the exact same parts as those used on a new OEM vehicle

WABCO GENUINE REMANUFACTURED AIR DRYERS

Only Meritor offers WABCO Genuine remanufactured System Saver air dryers for original specification quality and the performance you demand. All WABCO remanufactured air dryers are built with genuine WABCO components and validation testing that ensure OE quality, durability and performance.

WABCO Genuine remanufactured air dryers come standard with top-of-the-line WABCO cartridges; 100% of sealing components are new and specified to OE quality. Stringent end-of-line testing assures the quality that comes with the WABCO name.

- Remanufactured using genuine WABCO cores and production components
- All remanufactured WABCO air dryers come with a WABCO Genuine standard or coalescing air dryer cartridge
- Remanufactured by WABCO to their exacting standards
- Same 1-year warranty as new product offering

MERITOR AFTERMARKET AIR SYSTEM OFFERING

Meritor Aftermarket air system products are design-engineered to fit all OEM specifications, and deliver lasting value and dependable productivity for second and third owners. They are, in fact, high-quality, all-makes aftermarket parts manufactured to our design and engineering standards to meet aftermarket performance expectations on all makes of vehicles. Meritor Aftermarket air system parts provide a proven level of quality, performance and value at a lower price than genuine parts.

AIR DRYERS.

Designed to fit and function as original equipment, Meritor Aftermarket air dryers are a quality, new equipment alternative for non-WABCO air dryers.

- Price-competitive alternative to genuine OE air dryers
- Backed by Meritor, the name you know and trust for quality and unparalleled service

REPAIR KITS.

Improve the performance of existing air dryers at a fraction of the cost of genuine OE kits. Meritor Aftermarket repair kits feature quality performance air dryer components for non-WABCO air dryers.

- Full complement of parts and kits for AD9, ADIP, ADIS, ADSP and T2000 units

100% new dessicant material in Meritor Aftermarket and Reman dryers and cartridges

MERITOR AFTERMARKET AIR SYSTEM OFFERING

We are committed to utilizing remanufacturing processes that consistently produce high quality products at an ISO 9001 certified facility. Meritor remanufactured products are a proven, innovative line of all-makes remanufactured air system products for commercial vehicles that have progressed in ownership and age.

AIR DRYERS.

- Meritor remanufactured air dryers are top-quality remanufactured OE air dryers backed by Meritor knowledge and expertise. They are a cost-effective alternative to new OE replacement components for “experienced” vehicles.
- Tested to Meritor’s exacting standards
- Backed by a 1-year warranty
- Direct replacement for competitive OEM air dryers
