

MERITOR® HYDRAULIC BRAKE ROTORS WITH PLATINUM PROTECT COATING

Superior Corrosion Resistance For Maximum Uptime.

Meritor® hydraulic brake rotors with Platinum Protect coating provide exceptional resistance to oxidation and corrosion. Thoroughly tested to withstand the toughest road conditions, these rotors help extend brake life and minimize downtime. Meritor hydraulic brake rotors with Platinum Protect are ideal for a wide variety of medium-duty vehicles, such as school buses, emergency vehicles and delivery trucks.

Features and Benefits.

- Proprietary coating thoroughly seals the rotor – even the outside edge of the cooling veins – to prevent corrosion and metal fatigue
- Provides protection for ABS tone ring teeth comparable to stainless steel tone rings
- Hydraulic brake rotors with rust-resistant Platinum Protect coating are backed by a 2-year/200,000-mile warranty

Corrosion-Free Tone Ring Promotes Proper ABS Function.

Proper functioning of a vehicle's anti-lock braking system (ABS) relies on several factors including precise interaction between the tone ring and the ABS sensors. Corrosion of the tone ring can disrupt this delicate relationship resulting in ABS faults. Rely on Platinum Protect coating to safeguard against corrosive buildup.

Salt Spray Testing Results		
After 240 Hours	After 576 Hours	After Test Completion
		

* 1,000 hours neutral pH salt spray testing per ASTM B117.

Proven Premium Protection.

Platinum Protect coating protects all aspects of the rotor including the cooling vein which requires proper function to allow heat dissipation. Corrosion on the cooling veins can cause prolonged heat buildup contributing to brake pad wear and shortened service life. Meritor Platinum Protect coating protects the entire rotor surface including critical cooling veins to help prevent corrosion and metal fatigue.

Salt Spray Testing Results	
Before Test	After Test Completion
	

* 1,000 hours neutral pH salt spray testing per ASTM B117.
