MERITOR® DRUM BRAKE AND WHEEL END PARTS CATALOG

TABLE OF CONTENTS

Drum Brake
& Wheel End

SECTION 1 — BRAKE HARDWARE - - - - -	1-1
BENDIX "BRAZILIAN" 15" DIAMETER BRAKES - - - - -	1-3
DEXTER 12-1/4" S CAM AIR BRAKE - - - - -	1-4
DEXTER TRAILER AXLE WITH 12-1/4" DIAMETER BRAKES - - - - -	1-5
DEXTER TRAILER AXLE WITH 16-1/2" DIAMETER BRAKES - - - - -	1-6
EATON 15" DIAMETER STANDARD & ES EXTENDED SERVICE BRAKES - - - - -	1-7
EATON 15" DIAMETER ES EXTENDED SERVICE BRAKES- - - - -	1-8
EATON 15" DIAMETER REDUCED ENVELOPE BRAKES- - - - -	1-9
EATON 16-1/2" DIAMETER 541 SERIES BRAKES - - - - -	1-10
EATON 16-1/2" DIAMETER ES EXTENDED SERVICE BRAKES- - - - -	1-11
EATON 16-1/2" DIAMETER ES II EXTENDED SERVICE BRAKES- - - - -	1-13
EATON 18" DIAMETER SELF-CONTAINED TRACTOR BRAKES- - - - -	1-14
PARTS FOR EATON (SHULER) C & E - - - - -	1-15
SERIES TRAILER AXLE WITH 12-1/4" DIAMETER BRAKES - - - - -	1-16
PARTS FOR EATON (SHULER) C, E & J SERIES TRAILER AXLE WITH 16-1/2" DIAMETER BRAKES - - - - -	1-17
PARTS FOR EATON (SHULER) 22R, 23R, 22L, 23L SERIES TRAILER AXLE WITH 16-1/2" DIAMETER BRAKES- - - - -	1-19
EATON TOP SPEC ES RETROFIT FOR FRUEHAUF 16-1/2" DIAMETER XEM BRAKES - - - - -	1-21
EATON TOP SPEC ES RETROFIT FOR MERITOR 16-1/2" DIAMETER Q BRAKES - - - - -	1-21
PARTS FOR FRUEHAUF PRO-PAR® TRAILER AXLE WITH 12-1/4" DIAMETER BRAKES- - - - -	1-22
PARTS FOR FRUEHAUF PRO-PAR® TRAILER AXLE WITH 16-1/2" DIAMETER BRAKES- - - - -	1-24
PARTS FOR HENDRICKSON INTRAAX® TRAILER AXLE WITH 16-1/2" DIAMETER BRAKES - - - - -	1-26
MERITOR TK, TKL, TKN, TL, TN, & TQ 12-1/4" X 7-1/2" Q BRAKES - - - - -	1-28
MERITOR W SERIES CAM BRAKES 14-1/2" X 4" & 6"- - - - -	1-29
MERITOR W SERIES CAM BRAKES 14-1/2" X 5" - - - - -	1-30
MERITOR W SERIES CAM BRAKES 14-1/2" X 8" & 10" - - - - -	1-31
MERITOR W SERIES CAM BRAKES 14-1/2" X 10" - - - - -	1-32
MERITOR Q SERIES CAM BRAKES FOR 15" X 4" STEERING AND DRIVE AXLES - - - - -	1-34
MERITOR Q+™ SERIES CAM BRAKES FOR 15" & 16-1/2" MX500 LONG LIFE & LX500 EXTENDED LUBE - - - - -	1-35
MERITOR T SERIES CAM BRAKES FOR 15" X 3-1/2" & 4" TYPE 1 AND TYPE 2 - - - - -	1-38
MERITOR T SERIES CAM BRAKES 16-1/4" X 3-1/2" - - - - -	1-39
MERITOR Q SERIES CAM BRAKES FOR 16-1/2" X 4", 5", 6", 7", 8-5/8" & 10" STEERING AND DRIVE AXLES - - - - -	1-40
MERITOR P SERIES CAM BRAKES FOR 16-1/2" X 4", 5", 6", 7", 8", 8-5/8" & 10" STEERING AND DRIVE AXLES - - - - -	1-41
MERITOR P SERIES CAST CAM BRAKES FOR 18" X 7" STEERING AND DRIVE AXLES - - - - -	1-42
MERITOR RL, RN, & RQ 16-1/2" X 7", 8-5/8" & 10" P OR Q BRAKES - - - - -	1-43
MERITOR TK, TKL, TKN, TL, TN, TP, TQ, & TR 16-1/2" X 7", 8-5/8" & 10" P OR Q BRAKES - - - - -	1-44
MERITOR TK, TKL, TKN, TL (4000 & 6000 SERIES) 16-1/2" X 7", 8-5/8" & 10" P OR Q BRAKES - - - - -	1-45
MERITOR TKD, TKLD, TLD DROP CENTER AXLES 16-1/2" X 7", 8-5/8" & 10" P OR Q BRAKES - - - - -	1-48
MERITOR TN, TQ & RQ 16-1/2" X 7", 8-5/8" & 10" P, Q OR Q+™ BRAKES - - - - -	1-51
MERITOR TP 16-1/2" X 7", 8-5/8" & 10" Q OR Q+™ BRAKES- - - - -	1-54
MERITOR TRD DROP CENTER AXLES 16-1/2" X 7", 8-5/8" & 10" Q OR Q+™ BRAKES - - - - -	1-56
SPICER (DANA) 12-1/4" DIAMETER "FAST CHANGE II" BRAKES - - - - -	1-57
PARTS FOR SPICER (DANA) D21 & D22 AXLES WITH 16-1/2" DIAMETER BRAKES - - - - -	1-59
STANDARD FORGE AXLE WITH 12-1/4" DIAMETER BRAKES - - - - -	1-61
PARTS FOR STANDARD FORGE A-17, A-19 & A-22 SERIES TRAILER AXLE WITH 16-1/2" DIAMETER BRAKES - - - - -	1-63
WAGNER 15" DIAMETER BRAKES - - - - -	1-65
BENDIX 15" DIAMETER WEDGE BRAKES - - - - -	1-67
MERITOR RSA & RSH WEDGE BRAKES, BACKING PLATE MOUNTED WITH ANCHOR PINNED SHOES 3-1/2" & 4" - - - - -	1-69

MERITOR RDA & RDH WEDGE BRAKES BOLTED-ON SPIDER 15" X 4", 5", 6" & 7" - - - - -	-1-70
MERITOR RDC WEDGE BRAKES FOR COACH APPLICATIONS 15-1/8" X 6" & 10" - - - - -	-1-71
BRAKE HARDWARE KIT & UNLINED BRAKE SHOE - - - - -	-1-72
BRAKE REPAIR KITS AND HARDWARE - - - - -	-1-76
BRAKE SHOE ROLLERS - - - - -	1-102

MERITOR CAMSHAFT QUICK REFERENCE GUIDE

How to use this Meritor Camshaft Quick Reference Guide

CAMSHAFTS

Length: Measure from under the cam shaft head to the first lock ring groove. (If two lock ring grooves, measure from the groove closest to the head, see inset)

Head type: Determine Camshaft Head type by reviewing the photos of each type and determine the type number.

Spline and count: Measure the spline diameter and count the number of splines.

Journal: Measure the camshaft journal diameter.

Head End: Determine left hand (LH) or right hand (RH) cam head rotation.

Axle: Confirm Axle location (Steer, Drive, Trailer).

Brake size: Confirm brake manufacture and size with customer.

Notes: Review note for additional variations.

Double Snap Ring Groove

Note 1 - Meritor Trailer Camshaft Journal Length and Hardware Selection

With the two different Meritor trailer camshaft journals, care must be taken to match the camshaft with the correct journal length (from under head to first snap ring groove) to the proper hardware. If the proper hardware is not used with these camshafts, damage can occur to foundation brake components, resulting in possible brake failure. Camshafts with the 2 5/64" journal length will work in all applications, but 1229C4137 Spacers will be needed with certain spiders (see table below).

SPIDER TYPE	JOURNAL LGTH.	1229C4137 NEEDED?	CAMSHAFT REPAIR KIT
Cast or Fabricated with Weld-on Bushing Retainer	1 25/32"	NO	R003520AHD, KIT8048, KIT8058, KIT8078A
	2 5/64"	YES	KIT8058, contains 1229C4137 Spacers
Fabricated with Bolt-on Bushing	2 5/64"	NO	KIT8078A, contains A3105L1078 Bolt-on Bushings

How to use this Meritor Camshaft Quick Reference Guide

Note 2 - Spicer (Dana) 12 ¼" Camshaft, Brake Shoe and Hardware Selection

The two current Spicer 12 ¼" camshaft designs that Meritor offers are the Standard head (Type 3 on Camshaft Quick Reference Guide), and the second design "Fast-Rise" head, with "0794" OE head marking (Type 5 on Camshaft Quick Reference Guide). Below is application information on these two camshaft series, along with the associated Meritor Brake Shoe and Repair Kit part numbers required.

The first design "Fast-Rise", with "M12" OE head marking, have been discontinued by Spicer and Meritor. Standard and first design "Fast-Rise" camshafts can be replaced in pairs with second design "Fast-Rise" when using the correct shoe and roller (see below). Do not mix standard, first design or second design "Fast-Rise" camshafts on a single or tandem axle.

SHOE TYPE USED	MERITOR PART NO.	SHOE WIDTH	FMSI	BRAKE REPAIR KIT	ROLLER PART NO.	ROLLER DIAMETER	ROLLER DESIGN	CAMSHAFT DESIGN
Cast		5½"	4544	R507014	1199A625	1 ¼"	2 Piece	Standard
		7½"	4607					
Fabricated "Severe Service" (Closed Roller End)	R700005	5 ½"	4536B	R507015	R517003	1 ½"	2 Piece	Standard
	R704591	7½"	4591	R507068*				
Fabricated "Standard Version" (Open Roller End)	R700005	5 ½"	4536E	R507074	2297T7222	1 ¼"	1 Piece	Standard
				R507075*				
	R700007	7 ½"	4692	R507088	1779D82	1 ½"	1 Piece	"Fast-Rise" (0794)
				R507074*				
Fabricated "U" (Open Roller End)	R700011	7 ½"	4692	R507076	2297T7222	1 ¼"	1 Piece	Standard
				R507090	1779D82	1 ½"	1 Piece	"Fast-Rise" (0794)

* Conversion Brake Repair Kits to install fabricated shoes on bolt-on spiders, in place of cast shoes

"Extended Life" Camshafts

Meritor's "Extended Life" descriptions apply to Meritor's "Q Plus", Spicer Dana's "Xtralife", and Eaton's "ES". For look-up purposes, Meritor groups these 16 ½" versions together. Meritor "Q Plus", Dana "Xtralife", and Eaton "ES" are registered trademarks.

When retrofitting from standard head to "Extended Life" camshafts, Meritor strongly recommends replacing both camshafts on a single axle or all camshafts on a tandem axle to promote a balanced brake condition. To retrofit standard or first design "Fast-Rise" Spicer 12 ¼" camshafts, see Note 2, above.

Meritor 16 ½" Steer Axle "Hammer Claw" Camshaft Replacement

To replace Meritor's discontinued "Hammer Claw" camshafts on 16 ½" steer axle brakes, use the same length "Q Plus" camshaft and the 2258Y1273 offset-center bar return spring (Brake Repair Kit KIT8081). The spring must be installed with the end hooks open toward the camshaft head. The 2258Y1273 return spring can also service the "Hammer Claw" camshaft.

Length: Measure from under the cam shaft head to the beginning of the first lock ring groove in the splines.

Head type: Determine Camshaft Head type by reviewing the photos of each type and determine the type number.

Spline and Count Measure the spline diameter and count the number of splines.

Journal: Measure the camshaft journal diameter.

Head End: Determine left hand (LH) or right hand (RH) cam head rotation.

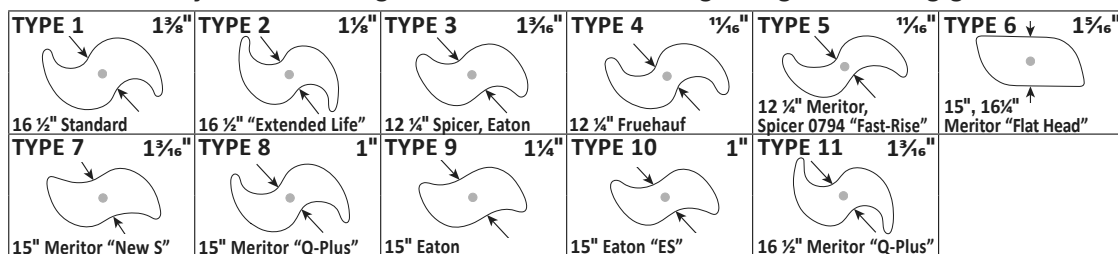

Axle: Confirm Axle location (Steer, Drive, Trailer).

Brake size: Confirm brake manufacturer and size with customer.

Notes: Review note for additional variations.

Listed by camshaft length from under head to beginning of lock ring groove.

Head End*

Camshaft head photos are for identification purposes only — Actual camshaft head may vary slightly in dimension or appearance.

*Left or Right Hand description refers to the rotation of the Camshaft Head. This description does not always match the position of the Camshaft on the axle.

- Length:** Measure from under the cam shaft head to the beginning of the first lock ring groove in the splines.
- Head type:** Determine Camshaft Head type by reviewing the photos of each type and determine the type number.
- Spline and Count** Measure the spline diameter and count the number of splines.
- Journal:** Measure the camshaft journal diameter.
- Head End:** Determine left hand (LH) or right hand (RH) cam head rotation.
- Axle:** Confirm Axle location (Steer, Drive, Trailer).
- Brake size:** Confirm brake manufacturer and size with customer.
- Notes:** Review note for additional variations.

Camshaft head photos are for identification purposes only — Actual camshaft head may vary slightly in dimension or appearance.									

*Left or Right Hand description refers to the rotation of the Camshaft Head. This description does not always match the position of the Camshaft on the axle.

Length: Measure from under the cam shaft head to the beginning of the first lock ring groove in the splines.

Head type: Determine Camshaft Head type by reviewing the photos of each type and determine the type number.

Spline and Count Measure the spline diameter and count the number of splines.

Journal: Measure the camshaft journal diameter.

Head End: Determine left hand (LH) or right hand (RH) cam head rotation.

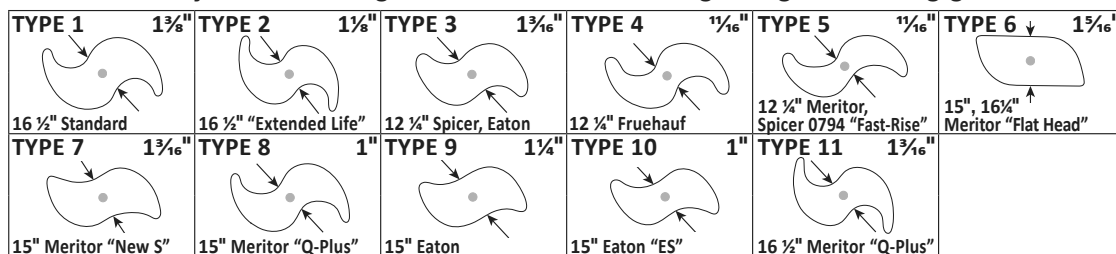

Axle: Confirm Axle location (Steer, Drive, Trailer).

Brake size: Confirm brake manufacturer and size with customer.

Notes: Review note for additional variations.

Camshaft head photos are for identification purposes only — Actual camshaft head may vary slightly in dimension or appearance.									

*Left or Right Hand description refers to the rotation of the Camshaft Head. This description does not always match the position of the Camshaft on the axle.

Length: Measure from under the cam shaft head to the beginning of the first lock ring groove in the splines.

Head type: Determine Camshaft Head type by reviewing the photos of each type and determine the type number.

Spline and Count Measure the spline diameter and count the number of splines.

Journal: Measure the camshaft journal diameter.

Head End: Determine left hand (LH) or right hand (RH) cam head rotation.

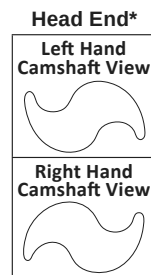

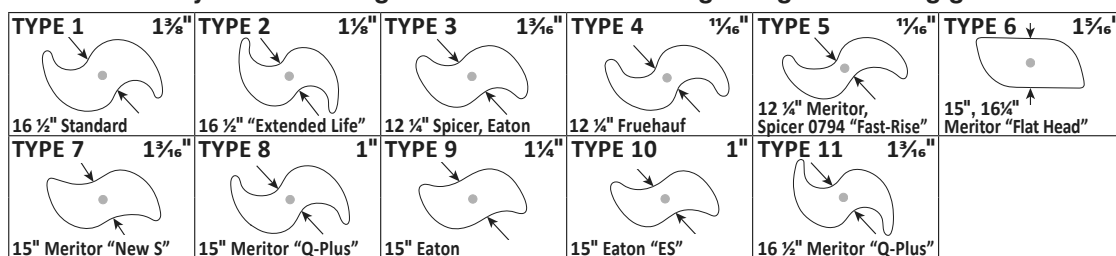

Axle: Confirm Axle location (Steer, Drive, Trailer).

Brake size: Confirm brake manufacturer and size with customer.

Notes: Review note for additional variations.

Camshaft head photos are for identification purposes only — Actual camshaft head may vary slightly in dimension or appearance.									

*Left or Right Hand description refers to the rotation of the Camshaft Head. This description does not always match the position of the Camshaft on the axle.

Length: Measure from under the cam shaft head to the beginning of the first lock ring groove in the splines.

Head type: Determine Camshaft Head type by reviewing the photos of each type and determine the type number.

Spline and Count Measure the spline diameter and count the number of splines.

Journal: Measure the camshaft journal diameter.

Head End: Determine left hand (LH) or right hand (RH) cam head rotation.

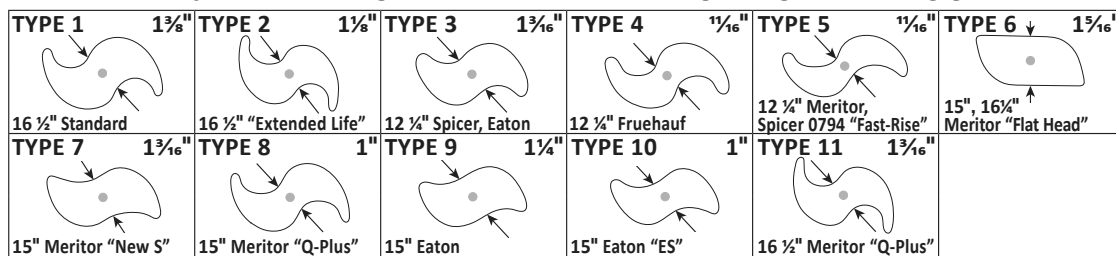

Axle: Confirm Axle location (Steer, Drive, Trailer).

Brake size: Confirm brake manufacturer and size with customer.

Notes: Review note for additional variations.

Camshaft head photos are for identification purposes only — Actual camshaft head may vary slightly in dimension or appearance.																						

*Left or Right Hand description refers to the rotation of the Camshaft Head. This description does not always match the position of the Camshaft on the axle.

Length: Measure from under the cam shaft head to the beginning of the first lock ring groove in the splines.

Head type: Determine Camshaft Head type by reviewing the photos of each type and determine the type number.

Spline and Count Measure the spline diameter and count the number of splines.

Journal: Measure the camshaft journal diameter.

Head End: Determine left hand (LH) or right hand (RH) cam head rotation.

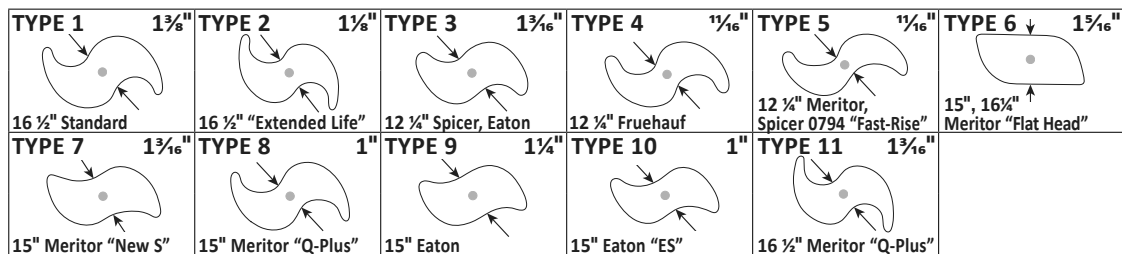

Axle: Confirm Axle location (Steer, Drive, Trailer).

Brake size: Confirm brake manufacturer and size with customer.

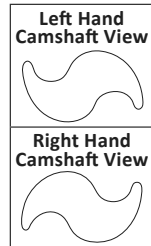

Notes: Review note for additional variations.

Camshafts Used with All Trailer Axle Kits Except KIT 1760 or KIT 8289

Do not install any of the camshafts listed in Figure 1 if you are using KIT 1760 or KIT 8289. The bearing journals on these camshafts ("B") are too narrow to be used with the bushing retainer (A-3105-L-1078) in these kits.

Figure 1

- Holds more grease - cams last longer
- Oil-impregnated bushings last longer than nylon

For greater camshaft life where trailer is subjected to extreme operating conditions.

Note: Bushings are not replaceable.

CHOOSING THE CORRECT MERITOR AUTOMATIC SLACK ADJUSTER

FIRST: Make sure there is room for the ASA to operate!

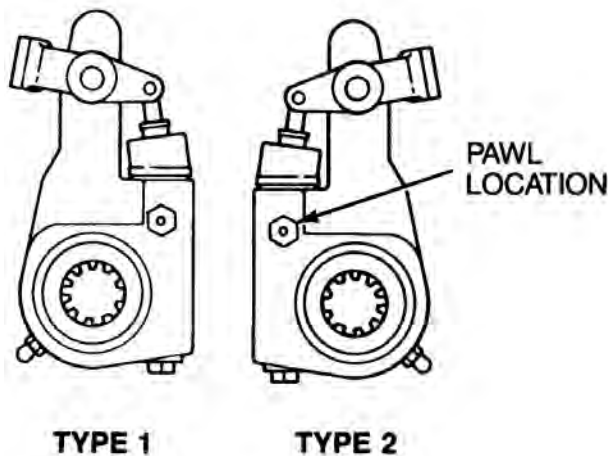

The Unhanded design slack is simply one in which the pawl assembly has been moved to the “edge” of the slack. The Unhanded design purpose is to eliminate having to stock pairs of slacks. In some cases, this pawl location won’t be the best choice for clearance with other components in the axle area or for service accessibility to the ASA. When this occurs, use a Handed design.

The Handed design locates the pawl on the main body of the ASA. These ASA’s are available as Type One and Type Two pawl mountings to fit each side of the axle and aid in accessibility in service and clearance with other axle components.

UNHANDED ASA

HANDED ASA

TYPE 1

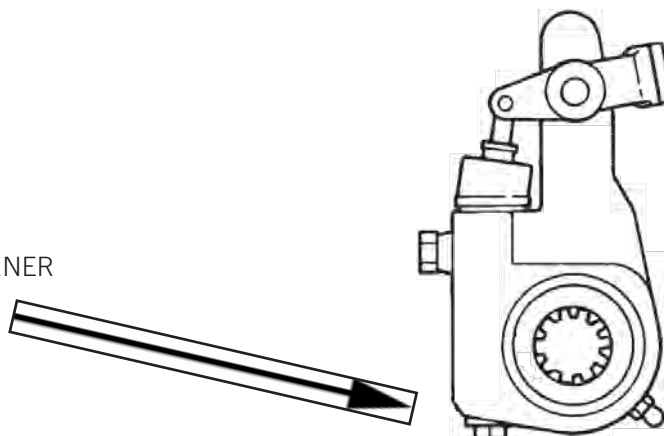

TYPE 2

SPECIAL ASA DESIGNS FOR CLEARANCE CIRCUMSTANCES

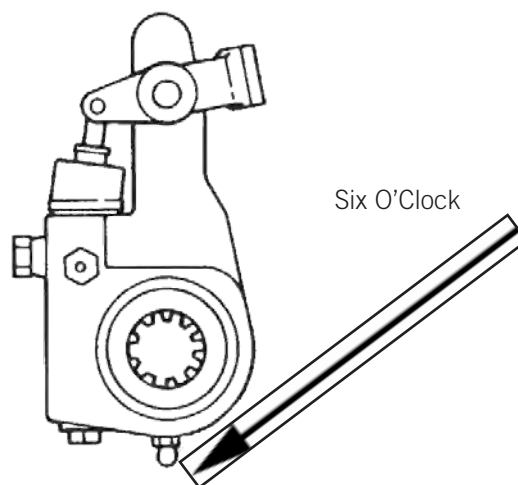

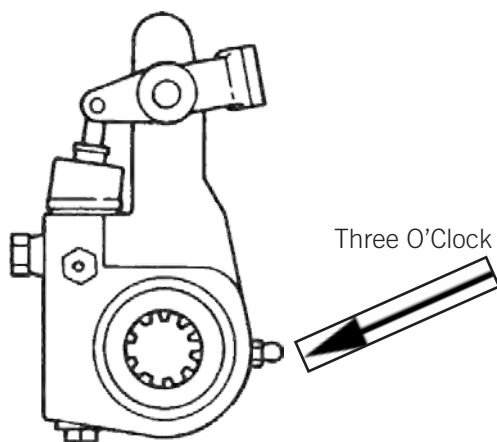

Drum Brake
& Wheel End

Machined corner ASAs have just that, a slightly machined off corner. This was done on certain applications where additional clearance was necessary. These machined corner numbers may substitute another slack of the same attributes without a machined corner.

MACHINED CORNER

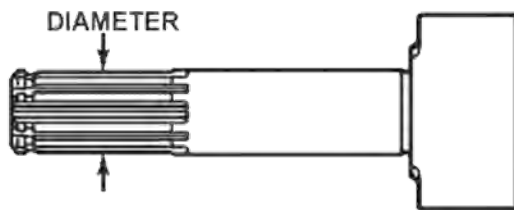

Relocated grease fittings are another attribute for some slack applications. This relocated grease fitting came about when the OEM application required the zerk to be at a different location other than the normal "4:30 position". 3 O'clock and 6 O'clock are the two other options available for some applications.

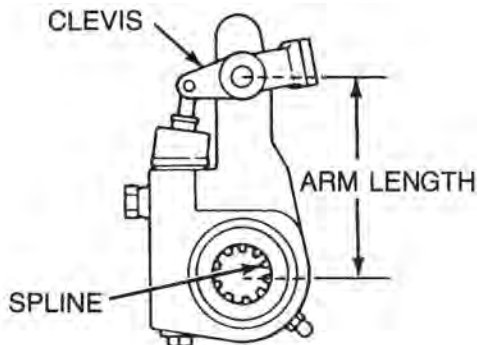

ONCE THE CLEARANCE AND HANDED ISSUES ARE DETERMINED, ASA SELECTION IS EASY! YOU JUST NEED THE FOLLOWING INFORMATION ABOUT THE VEHICLE APPLICATION:

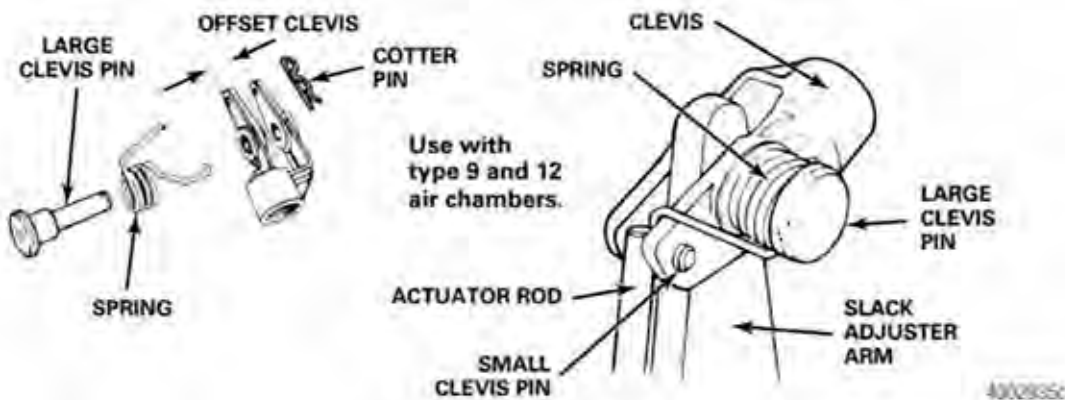

1. SPLINE DIAMETER AND SPLINE COUNT OF THE CAMSHAFT

2. ARM LENGTH Distance from center of cam to the main clevis center hole.

3. CLEVIS CONFIGURATION Clevises are either straight or offset. In some cases a helper spring will be needed for use with the clevis. This will occur with the smaller chamber types 9 and 12.

4. CLEVIS THREAD SIZE This will correspond to the air chamber push rod. Generally, chamber sizes 9, 12 and 16 will use a 1/2"-20 thread clevis, and chamber sizes 20, 24, 30 and 36 will take a 5/8"18 thread clevis. All aftermarket clevises are threaded. The "quick connect" clevis is for OEM production assembly use only.

5. THE AIR CHAMBER SIZE AND TYPE OF BRAKE The Meritor ASA adjustment is precision tuned by the piston in the actuator adjusting sleeve. There are two pistons of differing lengths depending upon the chamber application and will impact two things:

- A) When the actual brake lining adjustment is necessary
- B) Adjusted Chamber Stroke length visible to the operator

- For drum brakes, the most common drive axle chamber size is a type 30. Heavy application will use type 36. Front axle will typically use types 9 through 20.
- For Meritor air disc brakes, a 5-1/2" arm length, 1-1/2"-28 spline is standard. The air chambers will vary from type 20 to type 30. Type 24 and 30 are typical chamber sizes for rear air disc brakes.
- Please Note: Both wheelends for each axle should have compatible ASA part numbers! DO NOT mix different Meritor part numbers on an axle because they may have different pistons and therefore different adjusted lining clearances.

CHAMBER SIZE AND PISTON LENGTH CAN SUBSTANTIALLY IMPACT STROKE LENGTH

- All brakes have normal deflection, lining running clearance, and thermal expansion variances.
- Below is an example of a "typical" drum brake setup running at 600 degrees braking temperature and the corresponding maximum stroke increments for each activity taking place in the brake:

.80" stroke = Drum thermal expansion

.72" stroke = Normal lining running clearance

.27" stroke = Deflection of brake and drum

1.79" stroke = Measurable to inspectors

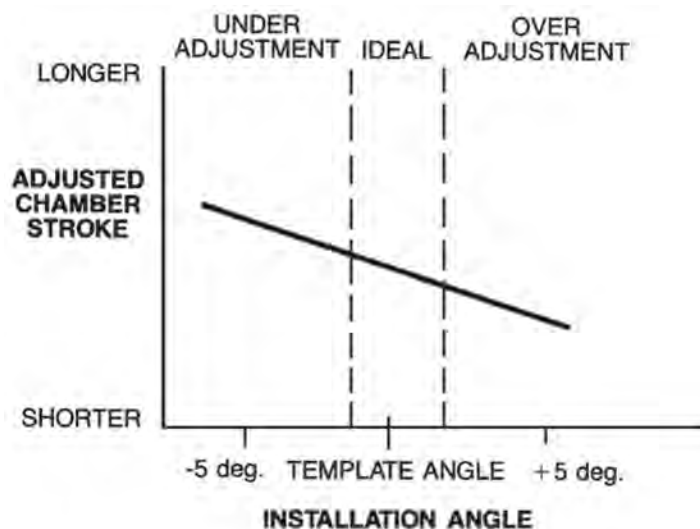

(If 2.0" is the established acceptable stroke, the vehicle is within the legal limits.)

- If the proper ASA part number with the corresponding piston length for that chamber application is NOT used, the chamber push rod stroke and therefore the adjustment interval will be affected. To what degree depends upon the length variance between the correct piston for that chamber application and the wrong one.
- Each change in length can represent up to a .10 inch difference in push rod stroke. The .10 difference, in addition to the above normal effects on stroke, could put the vehicle out of service for an inspection violation.
- When you are selecting an ASA, make sure that the chamber size corresponds to the ASA part number. Note: ASA selection for air disc brakes is slightly different than for drum brakes. Please pay attention to the ADB notations in the parts catalogs and wall charts.

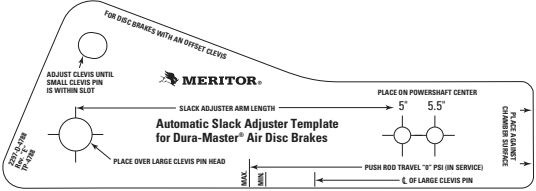

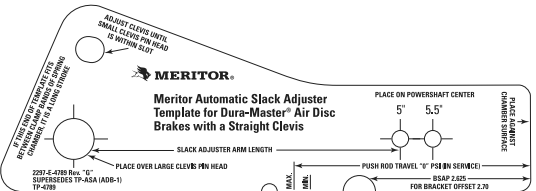

Once you've selected the right ASA type and part number, it is important to instruct the customer on installation of the ASA. There are installation templates in the box with the slack adjuster. Each installation template is designed to line up the clevis, push rod, and arm at a particular angle so that the most efficient adjustment of the brakes is obtained. Should the installation angle be off from the required template angle for that application, over adjustment or under adjustment will result - and therefore push rod lengths may be off from the acceptable lengths!

USE OF THE TEMPLATE WILL GIVE YOU THE IDEAL ADJUSTMENT

An example of the relationship is as follows:

This is why the installation templates should be used and the correct part number/piston/chamber relationship needs to be maintained.

TEMPLATES	TEMPLATE COLOR	LOD NO.	APPLICATION
	Dark Brown	TP-4786	Truck or tractor drum brake with 1.38" clevis pin spacing
	Tan	TP-4787	Trailer drum brake
	Cool Grey	TP-10130	Truck or tractor drum brake with 1.30" clevis pin spacing
	White	TP-4781	Coach drum brake with 7-inch or bolt-on slack adjuster
	Green	TP-4788	Air Disc Brakes with an Offset Clevis
	Yellow	TP-4789	Air Disc Brakes with a Straight Clevis

NOTE: Use either the Template Method* or BSAP Method* to ensure the correct position of welded or threaded clevises on standard- or long-stroke brake chambers.

* For more information on the Template or BSAP Methods, refer to Meritor Maintenance Manual 4, Cam Brake and Automatic Slack Adjusters. For information on welded-clevis air brake chambers, refer to the air brake chamber manufacturer's maintenance publication.

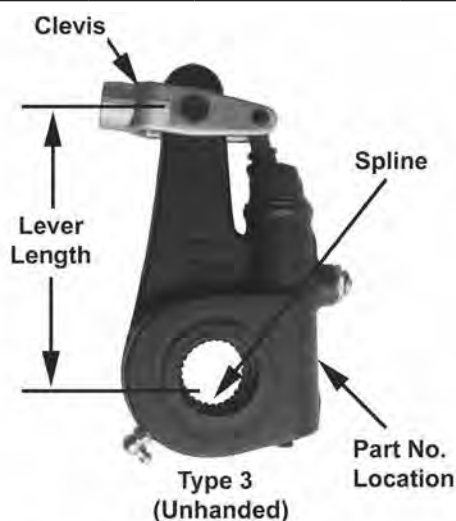

MERITOR AUTOMATIC SLACK ADJUSTERS (STROKE SENSING)

TRACTOR BRAKE CHAMBER BRACKETS

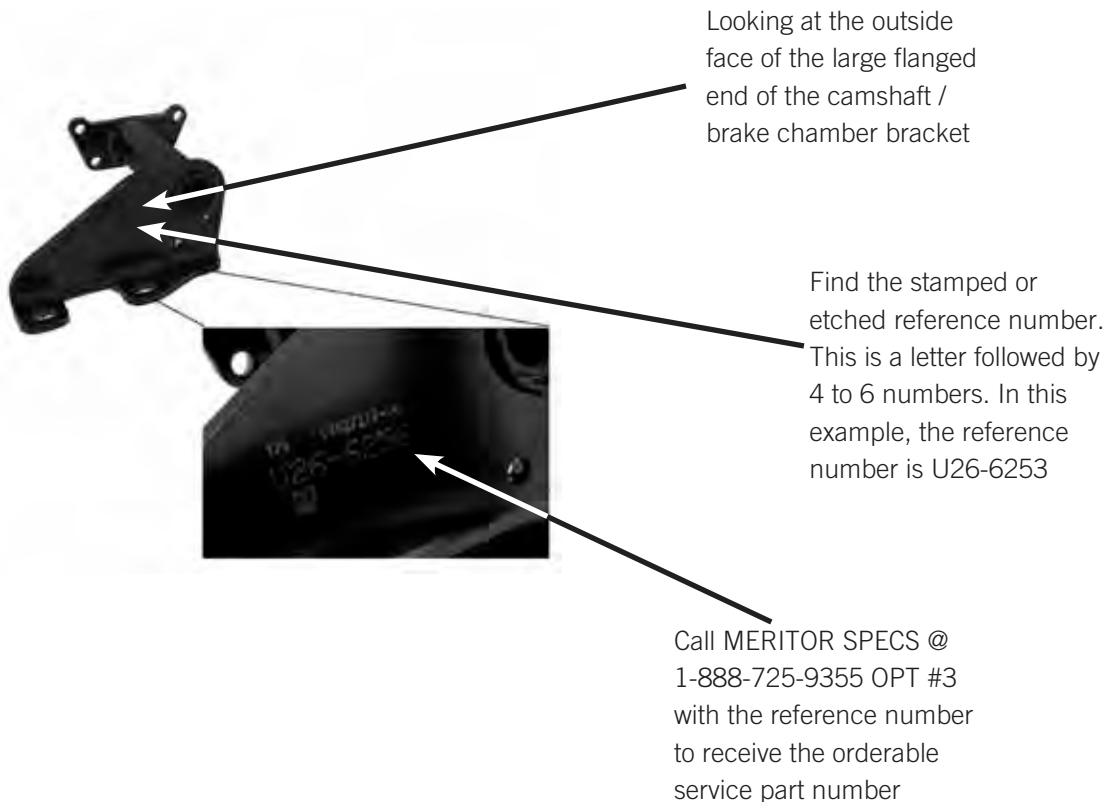

Brake chamber brackets and cam tubes not only house the brake chamber, camshaft, bushings, grease and seals, but they also enable the brake chamber to transfer power to the ASA and eventually the camshaft. The longer the tube, the more strain the tube and bracket endure. By adding a support, weight of the chamber is transferred to the support and it also is kept centered.

BCCC and CBFCC

- BCCC (Brake chamber centerline camshaft centerline)
- This is the measurement of the CHAMBER BRACKET FLANGE TO CHAMBER CENTERLINE. In order to properly take this measurement, the assembly must be installed on the unit.
- CBFCC (Chamber Bracket Flange to Chamber Centerline)
- This is the measurement of the cam tube spider flange to the brake chamber centerline
- A support bracket is required if the CBFCC is over 10.00 inches with a cast spider or 10.75 with a stamped spider a support bracket is required.
- A triangular shaped piece of steel welded between the chamber bracket and tube and cam tube spider flange and tube. These are used for additional cam support and in rare cases it is used in place a support bracket.

For detailed replacement procedure, refer to document TP-0932,
Procedures to Replace Standard "V" Style Brake Chamber Bracket.

Hazard Alert Messages

Read and observe all Warning and Caution hazard alert messages in this publication. They provide information that can help prevent serious personal injury, damage to components, or both.

⚠ WARNING

To prevent serious eye injury, always wear safe eye protection when you perform vehicle maintenance or service.

Park the vehicle on a level surface. Block the wheels to prevent the vehicle from moving. Support the vehicle with safety stands. Do not work under a vehicle supported only by jacks. Jacks can slip and fall over. Serious personal injury and damage to components can result.

When raising the trailer/axle, place lifting devices and/or jack stands directly under the spring seat bracket or other area of the trailer frame. Do not place lifting devices or jack stands directly on the axle beam or damage to the axle may result.

Guidelines

For complete welding instructions, refer to Maintenance Manual 8, Drive Axle Housings, Welding and Repair Procedures.

The installation and service performance of all suspension system brackets welded to Meritor axles are the responsibility of the system integrator.

Only Use Certified Welders

The American Welding Society's (AWS) Document D1.1 requires that you only use certified welders.

Methods

- Four methods can be used to weld hardware to trailer axles.
 - Shielded Metal Arc (Stick electrodes)
 - Gas Metal Arc (MIG — Solid Wire)
 - Gas Tungsten Arc (TIG)
 - Flux Cored Arc (Tubular Wire)
- Refer to the following table for the American Welding Society (AWS) classifications and specifications.
- The AWS requires that weld tensile strength must be 70,000 psi (4826.33 bar). Weld tensile strengths that are either higher or lower than this rating are not acceptable.

METHOD FOR WELDING CARBON AND LOW ALLOY STEELS	AWS ELECTRODE CLASSIFICATION	AWS SPECIFICATION
Shielded Metal Arc	E70XX	A5.1 A5.5
Gas Metal Arc	ER70S-X	A5.18
Gas Tungsten Arc	ER70S-X	A5.18
Flux Cored Arc	E70T-X	A5.20

- The best fusion and strength will be obtained using the voltage, current and shielding medium recommended by the electrode manufacturer.
- If the Shielded Metal Arc method is used, electrodes must be clean, dry and come from stock that has been stored according to AWS specifications.

Axle Preparation

- The area to be welded must be free of paint, grease, dirt, slag and other contaminants that can affect weld quality.
- The axle tube and the hardware to be welded to the axle must be at a temperature of at least 60°F (15°C). Welds made with the axle components at the correct temperature will perform better, since there is less of a tendency to form an area of brittle material next to the weld.
- Never bring an axle into a factory or repair facility from the cold and immediately weld. Rather, the axle and brackets to be welded should be stored overnight in a correctly heated room.
- If temperature requirements are not met, pre-heat the weld area to a temperature of at least 200°F (93°C) using a "rosebud." Do not concentrate heat in one area. Rather, slowly heat a wide area around the joint to be welded. Verify the temperature with a temperature-sensitive crayon or other appropriate means.

Hardware Fit

- Refer to the axle and suspension manufacturer's installation documentation for weld zones and locations.

MERITOR BRANDED CAM SPRING BRAKES AND COMPONENTS

AIR CHAMBER BRACKETS		
	MERITOR NO.	GENERAL INFORMATION
	3299U5299	Meritor Paymaster 4" x 6" Axle. For 16-1/2" brakes.
	R002518A	Spicer and Standard Forge Axles. 5/16" Thick. Also used on any 5" Round Axle using spring brakes. For 16-1/2" brakes.
	3299A5981	Meritor 5" Round Axle. For 16-1/2" brakes.
	R630017	Fruehauf Pro-Par® Axle with 16-1/2" brakes. Allows use of 5-1/2" or 6" slack adjusters. Sold as set only.

MERITOR WHEEL BEARING ADJUSTMENT SYSTEM FOR THE AFTERMARKET

Optimal Preload with the Doctor Preload Tool.

Doctor Preload, when used in conjunction with Temper-Loc spindle nuts, is the ideal wheel-end bearing adjustment solution. The system sets the bearings to precise preload settings with a quick, simple, reliable and repeatable process.

Features and Benefits:

- Measured, precise, repeatable settings to optimal preload for more time on the road
 - Improved tire life
 - Optimal bearing, spindle and wheel seal life
 - Decreased ABS faults
- Adjusts wheel-end bearings to meet SAE J2535 recommended preload settings

Temper Axle Products Corporation
Leading the world in bearing adjustment technology

Performance Sealed In. Dirt Sealed Out.

For wheel ends, the road, weather and frequent braking can dish out some serious punishment. And if wheel seals fail, wheel-end performance may be diminished, ultimately leading to costly repairs and downtime.

The leading cause of premature wheel-seal failure is damage to the seal during installation. Meritor wheel seals not only provide outstanding lubricant retention and protection against contaminants, but they are also easier to install, which significantly decreases the potential for damage during installation.

That's the idea behind Meritor wheel seals. The result is longer seal life and a lower cost of operation.

Easy To Fit. Hard To Damage.

Meritor wheel seals have been designed with an extremely stiff profile and one of the thickest steel cases used in a seal today. So the potential for installation damage is virtually eliminated. Best of all, you can use any tool to install it – even your hands.

Superior Protection.

The multi-zone labyrinth design and low-friction barrier deliver unmatched durability and protection against dirt, grime, water and other contaminants. The bumper transmits the fitting force from the front of the seal to the outer diameter, and acts as the first defense against contaminants. The multi-zone labyrinth features low-profile section right-angle corners, a low-friction barrier, two rubber wipers and a specifically formulated waterproof grease – for superior protection.

A Choice Of Grades.

Designed for drive, steer and trailer axles, Meritor wheel seals are available in Standard and Premium versions.

Our Standard wheel seals feature a nitrile compound rubber (NBR) for the sealing lip. Our Premium wheel seals feature a hydrogenated nitrile butadiene rubber (HNBR), offering additional advantages of higher temperature capability, greater wear resistance, and compatibility with all known synthetic lubricants.

Keep Your Trucks Up and Moving

Timken MileMate sets – the original matched wheel bearing sets – are designed to keep your trucks up and moving.

Benefits

- Accurately matched sets allow bearings to more evenly distribute loads, extending bearing life
- Supported by 1-year/unlimited mileage aftermarket parts warranty

Meritor genuine hubcaps for the aftermarket are the best choice to maintain vehicle performance with genuine OEM replacement product. The comprehensive offering includes a hubcap to meet the operating demands of most heavy-duty applications.

Performance Advantages:

- Approved, Genuine OEM replacement product
- Meritor name stamped on each cap ensures you are receiving Genuine product
- Aluminum caps are made with hi-impact poly windows for durability
- Screw-on caps in aluminum or hi-impact poly
- Poly screw-on caps also available with vented plug and hub odometer-ready
- All caps include plug and gasket or O-ring for quicker installation

UNIVERSAL BRAKE SHOE GAUGE

ANCHOR PIN GAUGE

- Go/No-Go Gauge For all Meritor and Fruehauf Standard and Quick Change Shoes.

WEB ALIGNMENT GAUGE

- Checks straightness of shoe web. (Except Eaton Shoes.)

MERITOR
R003863A

R003863A Tool

Can also be used to check the stretch of Wedge Brake Shoes. For detailed information, see instruction sheet included with each tool.

BRAKE SHOE
IDENTIFICATION

- Helps determine if a brake shoe is made by Fruehauf or Meritor.

STRETCH GAUGE

- Checks stretch of all 16 1/2" Eaton, Fruehauf, and Meritor Shoes.

BRAKE SHOE ANCHOR PIN PRESS

MERITOR NO.

R002654

GENERAL INFORMATION

A heavy-duty press that easily removes rusted and corroded brake shoe anchor pins without damage to the brake shoe spider. Removes pins up to 1-1/4" diameter. Also used to remove Brake Shoe Anchor Pins and U-Joints.

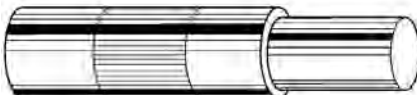

HEAVY-DUTY BRAKE DRUM GAUGE KIT

	MERITOR NO.	DESCRIPTION	GENERAL INFORMATION
	R009136	Heavy-Duty Brake Drum Gauge Kit	To quickly and easily measure scored, worn or heat-checked brake drums. Includes: Heavy-Duty Brake Drum Gauge, Gauge Calibration Tool, Meritor red hard plastic shell with padded interior to protect the Brake Drum Gauge. Measures any brake drum from 12" to 18" diameter in 1/4" increments. Both end tips of gauge are made with hardened steel balls inserted at contact points for accuracy and service. Easy-to-adjust slide bar shows exact drum diameter to be checked.
	R009139	Brake Lining/Block Thickness Gauge	Simplifies checking standard and oversized brake lining. Readings can be recorded in either percentages or linear measure.

SLACK ADJUSTER PULLERS

	MERITOR NO.	SLACK TYPE	GENERAL INFORMATION
	R009319	Manual	Eases the job of removing frozen slack adjusters. Available for Manual and Automatic Slack Adjusters. Slack Pullers have only one moving part and require only a wrench to use them. There are only four simple steps to follow to use the tools:
	R009320	Automatic	1. Remove the grease fittings from the slack adjuster. 2. Slide the puller onto the slack adjuster body. 3. Turn the bolt on the puller. The bolt is self-aligning for quick positioning. 4. Catch the slack adjuster as it comes off the camshaft.

BUSHING REMOVAL AND INSTALLATION TOOL

	MERITOR NO.	GENERAL INFORMATION
	R001362	Use to remove or install 1-1/4" I.D. press-in anchor pin bushings.
	R001250	Use to remove or install 1-1/2" I.D. press-in type camshaft bushings.
	R002739	Use to remove or install 1-5/8" I.D. press-in type camshaft bushings.

WHEEL BEARING LOCK-NUT WRENCHES

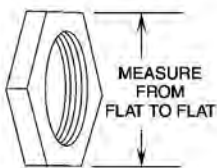

Meritor wrenches have a 3/4" drive square opening for use with an extension and torque wrench to tighten the Lock-Nut as required. A longer extension can be used for wide rims. Wrenches are made of high strength and heavy-duty gauge steel. Resists rounding out.

Listed by Opening Size

HOW TO DETERMINE THE WRENCH SIZE YOU NEED.....

Using a caliper or other suitable measuring device, determine the size of the Lock-Nut. Consult the chart at right to select the Lock-Nut wrench of corresponding size.

CROSS REFERENCE

PARTS XPERTISE XCELERATED.

XPRTISE THE DIFFERENCE. MeritorPartsXpress.com.

We work hard to make you and your business successful as your one-stop aftermarket parts resource with faster access to the product information, **X**pertise and tools you need. Build your business with our new “fewer clicks” catalog search and directly share organized product specifications with your customers. New Visual Search offers exploded parts assembly views for quick, accurate parts identification. Get immediate results when you search by Meritor part #, competitor part #, VMRS code and new **X**act Search tools. Finding parts **X**pertise just got easier – at MeritorPartsXpress.com.

MERITOR AFTERMARKET PARTS WARRANTY

We warrant all new parts for one year from date of shipment to the buyer against defective material or workmanship (but not against damage caused by accident, abuse or improper installation, maintenance or repair) when such parts are used on vehicles the specifications of which have been approved by our Engineering Department.

As the exclusive remedy under this warranty, we will, at our option, repair or replace such parts free of charge, or take back the nonconforming parts and refund the monies paid by buyer for such parts, if found on examination by us to be nonconforming and if any necessary return charges are prepaid.

If it is necessary to return any parts under this warranty, buyer agrees not to make any deduction on account thereof from remittances on current accounts while claims are in the process of disposition. Any expense incurred without our consent for repairs or replacement will not be allowed.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE.

Only Genuine Meritor replacement parts are covered by this aftermarket parts warranty.

Xcelerated Parts **X**pertise.

Expedite your search for more than 100,000 aftermarket products with powerful self-service tools to help boost your parts operations. For fast access to parts ordering on all Meritor aftermarket brands, plus enhanced Xact Search and Visual Search tools, competitive cross-references, product information, catalogs and more, visit **MeritorPartsXpress.com**.
