PORT AND TERMINAL TRACTOR AXLES

Cummins-Meritor port and terminal tractor axles are designed for maximum uptime, durability and productivity to give you a true competitive edge. Higher weight capacities allow more payload on every trip, while low cost of operation combines with enhanced durability and low maintenance requirements for an unbeatable package that reduces overall cost of ownership and keeps vehicles in use.

Our proven front and rear axle technologies are supported by over 110 years of experience in axle manufacturing and every product is backed by our global support network with complete customer service from product selection to aftermarket assistance.
