

GAFF[®] POLYURETHANE UNDERCARRIAGE COMPONENTS

Meritor now offers GAFF[®] polyurethane products, specifically designed for each application to increase the lifespan of the component. For over 35 years, GAFF's highly engineered polyurethane compounds have met the varying demands of heavy duty undercarriages.

What Makes GAFF[®] Polyurethane Different?

In a single word it is more RESILIENT. It is substantially less affected by UV or chemical agents on the road which means the material doesn't age compared to rubber components. High performance polyurethane is designed for the application to extend the uptime of the vehicle, in the harshest road conditions.

- Reduces maintenance costs and increases uptime by extending the life and replacement rate of undercarriage components
- More durable and resilient compared to rubber based products
