

MERITOR®

FRONT-END LOADER AXLES

Performance Advantages:

- Rich 100-year legacy in design and development of axle technologies
- Industry-leading testing capabilities, including extensive dynamometer competencies in our Troy, Michigan research and development center
- Employment of sophisticated application analysis tools such as Finite Element Analysis (FEA), Dynamic Analysis (ADAMS) and Drivetrain Life (DTL) simulations
- Numerous advancements in gearing, including utilization of contemporary design software and state-of-the-art gear manufacturing processes

MERITOR®

An **ArvinMeritor™** Brand

FRONT-END LOADER AXLES

Features and Benefits:

- Articulated trunnion mount for increased mobility
- Wet disc brakes for minimal maintenance
- High-capacity differential for superior durability
- Needle roller bearings to accommodate severe-duty loads and provide longer life

* Products produced by Xuzhou Meritor Axle Company, Ltd., a joint venture between ArvinMeritor, Inc. and Xuzhou Construction Machinery Group. Products are produced for utilization in China only.
